Search Notes

- Packets 1-2: structure search for claim 36 and text-based search focused upon treating malaria with fatty acid synthesis inhibitors OR triclosan OR cerulenin OR claimed structure specified; there were not many hits in Registry for the claimed structure, so HCAPLUS records containing them without any key word limitations are displayed at the end of packet 2
- Answer sets from some databases are limited by date to keep the sets to a manageable size
- Packet 3: search on hydroxy derivatives of diphenyl ether in HCAPLUS with text to address malaria/fatty acid concepts and with registry numbers for triclosan and cerulenin; note that the HCAPLUS record for the parent PCT contains an indexing term (101-84-8d) for these derivatives
- Packet 4: inventor search (beware of false hits and alternate sequences with names)

Please feel free to contact me if you have any questions or would like to amend/expand the search.

Thank you for using STIC services.

Regards,
Deirdre Arnold

STIC SEARCH RESULTS FEEDBACK FORM

Biotech-Chem Library

Questions about the scope or the results of the search? Contact *the searcher* or contact:

Mary Hale, Information Branch Supervisor

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 1610

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

Drop off or send completed forms to STIC/Biotech-Chem Library Remsen Bldg.

 Mail Box and Bldg/Room Location: 3A65 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need. MEJ

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: _____

Inventors (please provide full names): _____

Earliest Priority Filing Date: _____

**For Sequence Searches Only* Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.*

Search a composition comprising an inhibitor of
 fatty acid synthesis to treat malaria.

Search these preferred inhibitor

36. (currently amended) The An antimalarial composition comprising the compound of formula 9, wherein X is selected from the group consisting of O, S, and CH₂, wherein at least one of the positions R₉ or R₄ or R₇ or R₆ is an aldehyde group or a ketone group having at least 5 C atoms, wherein R₁ or R₂ is a hydroxyl (OH) group with the other being a hydrogen atom, and wherein at least one of R₁ to R₁₀ is a halogen atom.

and triclosan, cerulenin
